## RevOne Companies

We're the ones that get your patients insured

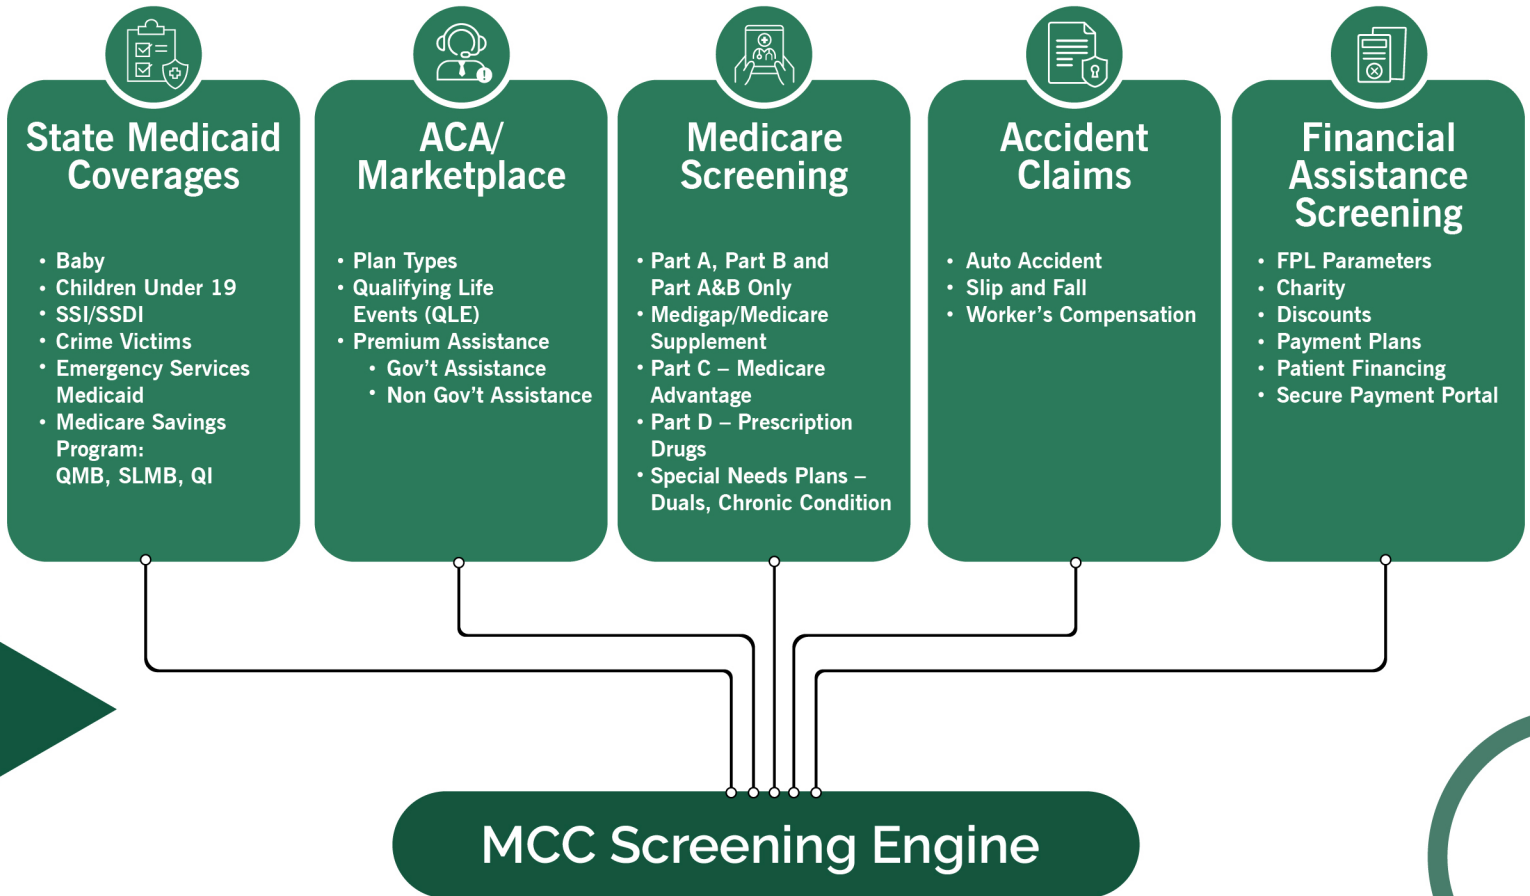

## The Challenge

- ❖ Uninsured patients often lack the financial means to access essential preventive and follow-up care, leaving them to seek treatment in emergency rooms instead.
- ❖ Many of these patients are willing to pay for healthcare but feel overwhelmed by the complex insurance system, which makes it difficult to find an affordable plan that meets their needs.
- ❖ Despite programs like the Affordable Care Act (ACA) and Medicaid, millions remain uninsured simply because they aren't aware of free or subsidized options that could ease their worries.
- ❖ For Hospitals, the journey uninsured patients face presents challenges, as many patients:
  - Do not qualify based on income thresholds.
  - Struggle to navigate the complex enrollment processes and give up.
  - Remain unaware of additional coverage options that might support them
  - Are hard to reach, leaving them without guidance for critical next steps.
- ❖ Additionally, Hospitals sometimes lack efficient tools and technology to compassionately support each patient in navigating insurance options before services are rendered.
- ❖ As a result, uninsured patients aren't given the dignity to afford their healthcare and are left vulnerable, unable to maintain a healthy life. While hospitals are often forced to write off potentially insurable claims as bad debt or charity.

## The Solution – MyCareCoverage (MCC)

- ❖ MCC is a universal solution accessible by any device to help patients find and enroll in health coverage, offering a compassionate and streamlined process to secure affordable care – whether it's before, during, or services are rendered.

*Provider Selects Preferred Screening Options*

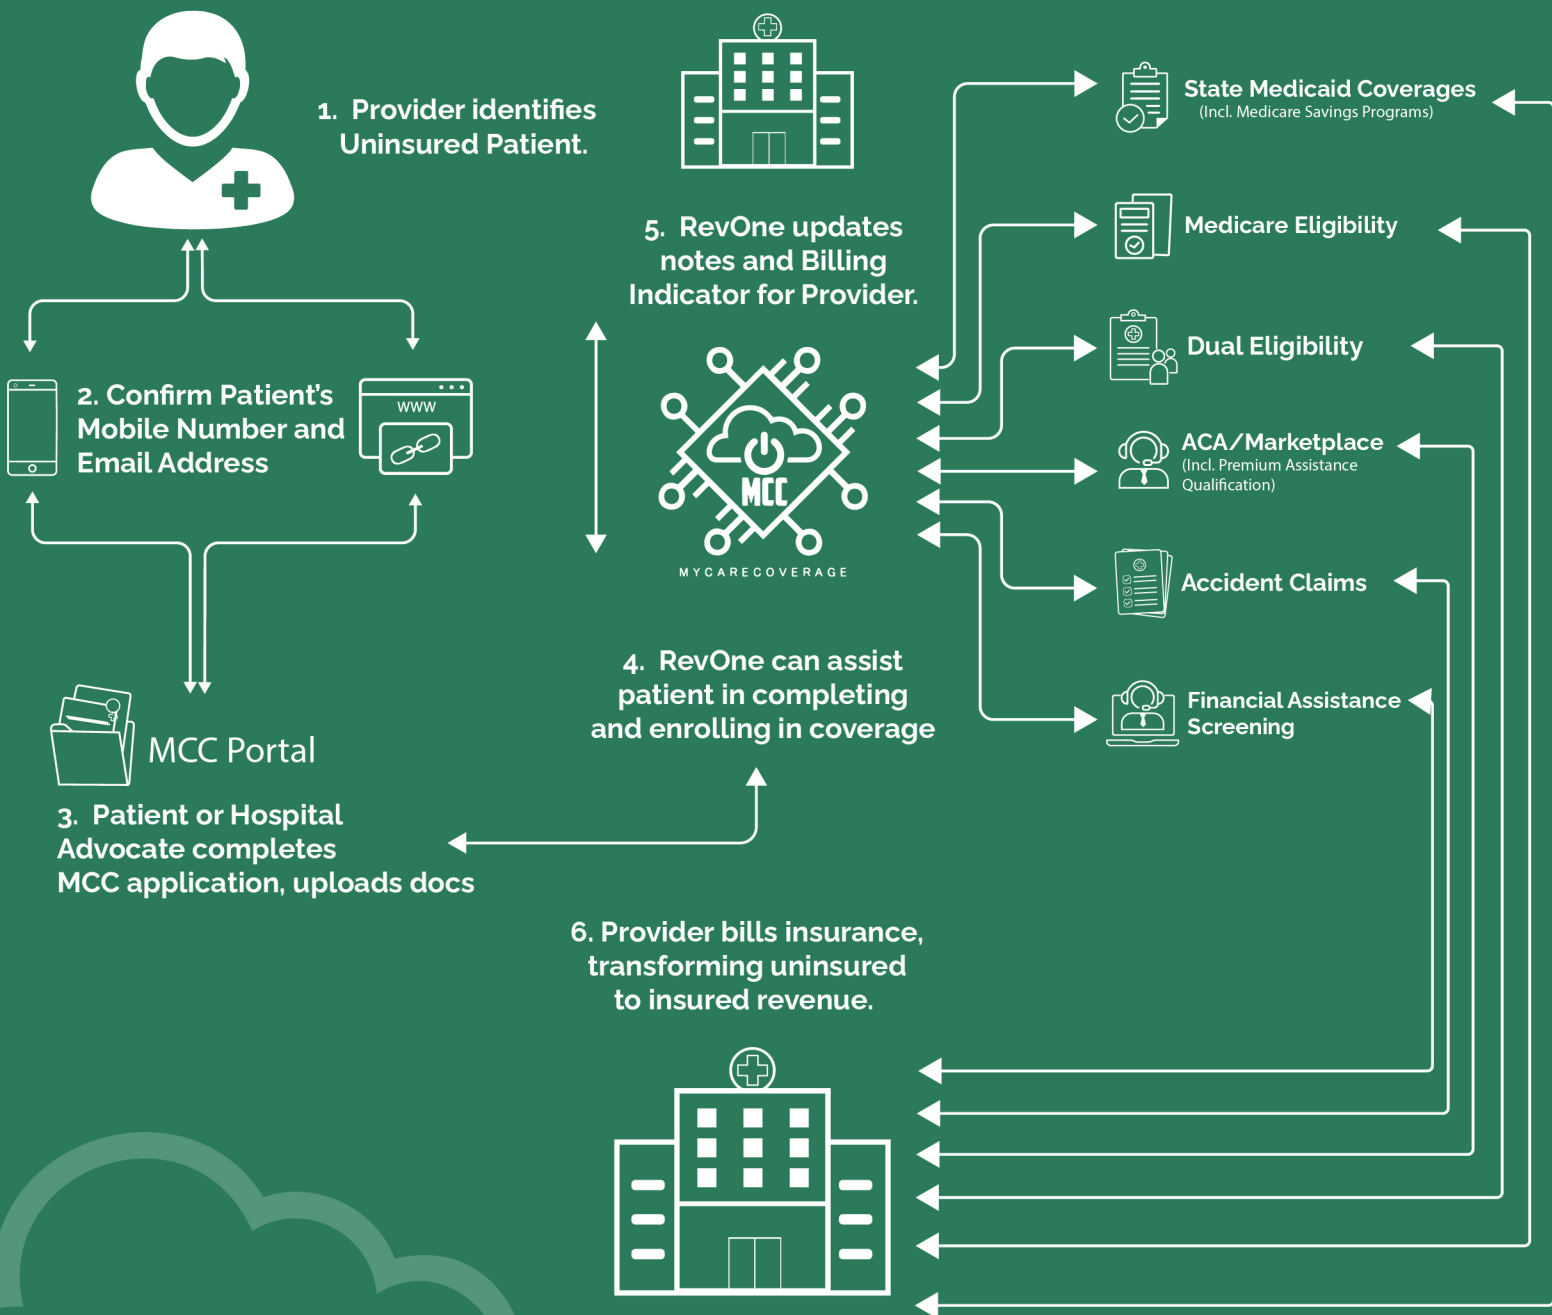

## Key Features of MyCareCoverage:

- ◆ Enables patients to securely upload documents directly into the portal for processing.
- ◆ Seamlessly integrate into financial assistance workflows to expand patient reach, enabling direct submission of forms from patients to your team.
- ◆ Screen for ACA Marketplace Qualifying Life Events (QLEs), enabling ACA enrollment outside of open enrollment.
- ◆ Screening for State Medicaid programs.
- ◆ Help patients enroll and qualify for Medicare Part A, B, C, D, and/or MediGap who have not yet signed up.
- ◆ Multi-channel outreach to patients that are difficult to engage.
- ◆ Direct access to RevOne Patient Advocates to help educate and enroll.

## The MyCareCoverage Portal creates tangible benefits:

- ◆ More uninsured patients are compassionately guided through screenings for all available insurance options, with easy access from any device.
- ◆ Patients are given dignity and peace of mind, knowing they can use their new insurance help pay for their medical charges.
- ◆ Hospitals recover previously lost revenue by helping patients enroll in coverage.
- ◆ Hospital staff can work more efficiently, freeing up time and resources.
- ◆ Patients can now live a healthier and longer life.

# RevOne Company Overview
